

## New China logistics hub in Suzhou

Logistics hub uses modern methods for smooth goods transport

**To quickly and reliably supply plants and laboratories with measurement and automation technology, Endress+Hauser strengthened its global supply chain capabilities by opening a new logistics center in Suzhou, China in March 2021.**

Plant availability is a crucial aspect in the ability to manufacture competitively. For a global company such as Endress+Hauser, smoothly operating supply chains are thus important. In order to quickly and reliably supply operators of process engineering plants and laboratories with instrumentation and other materials, the Endress+Hauser Group opened a modern product distribution center in the Chinese city of Suzhou.

The 5,000-square-meter, high-bay warehouse will initially supply domestic customers in China but has enough capacity to supply material to overseas production and sales centers in future. Among other features, a modern warehouse management system that continually monitors the inventory and provides notifications ensures a highly efficient order and delivery process. Standard workflows, services such as tracking & tracing, as well as continuous performance monitoring provide a smooth delivery process. "Customers benefit from full transparency during the delivery process and can monitor the status of their order at any time," says Arthur Zhang, Managing Director of Endress+Hauser in China.

"In light of the continued growing significance of the Chinese market for the Endress+Hauser Group, the opening of the new China logistics hub is an important factor in strengthening our global supply chain network," says Oliver Blum, Corporate Director Supply Chain of the Endress+Hauser Group. The facility, operated by the SF Group, includes an open and closed customs warehouse area, as well as warehouse space within the free trade zone of the Suzhou Industrial Park.

The high-bay warehouse will initially supply customers in the country, but the hub also has the capacity to supply product and sales centers overseas.

## **The Endress+Hauser Group**

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of approximately 2.6 billion euros in 2020 with a total workforce of more than 14,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,900 patents and applications protect the Group's intellectual property.
